PROFILE

I am an enthusiastic web developer. I graduated from the University of Sydney, and my major is a Master of Information Technology. I had developed several websites when I was in school, most of them are based on MongoDB, Express.js, React and Node.js. Now, I am looking for a computer-related job. Making a website often fills me with joy and a sense of accomplishment. I have some rich experience in website development, so I want to challenge a web application developer.
